Topic: Types of comments  
Description: In python there are two types of comments  
1. Single line comment(#)  
2. Multi line comment('' ''', "" "" ")  
""
```

```
"" print statements using comments ""
```

```
# print('hey python')
```

```
# print(''hey  
# python'')
```

```
# print("""hey  
# python""")
```

```
# print('Hey we are doing python \  
# programming and its \  
# tuesday today we have again \  
# connected back at 8PM')
```

```
# print(''Hey we are doing python \  
# programming and its \  
# tuesday today we have again \  
# connected back at 8PM'')
```

```
# print(''Hey we are doing python  
# programming and its  
# tuesday today we have again  
# connected back at 8PM'')
```
